

Application and assessment

To apply for approval of a product according to [Bra Kemråd](#) (Good Chemical Advice) an application must be sent in. Documents needed are stated in the application form.

[Application form](#) (pdf).

Application and attachments should be sent to brakemrad@goodpoint.se. For information please contact: Anna Persson, Goodpoint, phone +46-46-16 03 84.

Fee for assessment

The following fees are based upon complete applications.

The fee for an assessment of a new product is 5,500 SEK.

The fee for an assessment of an earlier approved but altered, to its composition, product is 5,500 SEK.

Applications concerning products included in several different product groups are charged 2,000 SEK extra for each additional product group.

Applications concerning identical products applying under several different names are charged 1,000 SEK extra for each additional registration name. The applications of the products must be filed within a period of maximum two months to get the reduced fee.

Renewed assessment of a completely unchanged, previously approved product is 4,500 SEK. The new application must be filed before the old approval expires to get the reduced price. Please note that the requirements regarding complete documentation apply.

Assessment

Each assessment is made according to the latest version of the [Requirements and criteria](#) (in Swedish). The assessment is performed of Goodpoint. The result of the assessment will be given within four to six weeks after Goodpoint has received the complete documentation.

All submitted material will be treated with strict confidentiality.

Approved products

Approved products are presented at the website of [Bra Kemråd](#). An approval lasts for three years. LRF Dairy Sweden reserves the right to cancel an approved product under extraordinary circumstances.

If help is required

Any supplier who has questions, wants to discuss the documentation or requires any further assistance is welcome to contact Goodpoint, Anna Persson, phone +46-46-16 03 84.
